

Five schedules of controlled substances have been defined as follows (the composition of these schedules may change by amendment to the Controlled Substance Act):

1. Schedule I Substances. Drugs in this schedule are those having a high potential for abuse, having no currently accepted medical use in the United States, or a lack of accepted safety. Some examples are: heroin, marijuana, LSD, peyote, mescaline, psilocybin, tetrahydrocannabinols, morphine methylsulfonate, and nicocodein.
2. Schedule II Substances. The drugs in this schedule have a high potential for abuse, a currently accepted medical use in the United States, and their use may lead to severe psychological or physical dependence. Most of Schedule II Substances have been known in the past as Class A Narcotic Drugs; some examples are: opium, morphine, codeine, dihydromorphinone (Dilaudid), methadone (Dolophine), pentopon, meperidine (Demerol), cocaine, oxycodone (Percodan). Also included in this Schedule is any compound which contains in any form the substance of methamphetamines as an injectable liquid.
3. Schedule III Substances. The drugs in this schedule have an abuse potential less than those listed in Schedules I and II, and include those drugs formerly known as Class B Narcotics, and non-narcotic drugs such as: glutethimide (Doriden), phenmetrazine (Preludin), methyprylon (Noludar), methylphenidate (Ritalin), nalorphine, and barbiturates (except phenobarbital, methylphenobarbital, and barbital). Paregoric is now listed in this schedule, as well as amphetamines and methamphetamines (except an injectable liquid).
4. Schedule IV Substances. The drugs in this schedule have an abuse potential less than those listed in Schedule III and includes drugs such as: barbital, phenobarbital, methylphenobarbital, chloral hydrate, ethchlorvynol (Placidyl), ethinamate (Valmid), meprobamate (Equanil, Miltown).
5. Schedule V Substances. The drugs in this schedule have an abuse potential less than those listed in Schedule IV, and consist of those preparations formerly known as Exempt Narcotics, with the exception of paregoric (Camphorated Tincture of Opium). Paregoric is now listed as a Schedule III Controlled Substance.
